

Janet Young

To Represent the 1st CD on the Virginia State Central Committee

May I have your vote on May 13th

Proud Prince William Democrat

I have worked to help elect Democrats in Prince William County in a number of pathways

- 1st CD Democratic Committee, Chair, Resolutions Committee
- Member State Central Committee since 2013
- Prince William County Democratic Committee
- Occoquan Magisterial District Committee
- Former Vice Chair Coles Magisterial District Committee
- Member and Editor of Newsletter for Democratic Women of Lake Ridge
- Democracy for America

Proudest Moments

Campaigning for Matt Rowe. Saturday mornings picking up walk packets to canvass for Matt. Through his tireless work, he showed everyone the heart of a true Democrat.

Resolutions Committee for 1st CD and Virginia State Conventions. As a representative of the 1st CD, I am proud to have been a part of the team that put together the most progressive platform in the state of Virginia for the 2016 election. I championed a resolution sparked by the Coles Committee.

Obama's election in 2008. Magic 48 hours with 4 hours sleep canvassing for GOTV to Obama's final rally to opening the polls to closing the polls to chanting "Yes We Did" at victory party.

Gerry Connolly's narrow win for Congress in 2008. The Coles Committee canvassed ferociously for Connolly. In his narrow 800 vote win, Connolly underperformed predictions in Fairfax County, but Prince William outperformed and Coles was the best performing district in the County.

Campaigning for Howard Dean in the New Hampshire Primary. In 2003, Howard Dean inspired me to become an activist. For the first time, I could hear my own voice in a presidential candidate. He pioneered internet organizing and we gathered from all over the country to canvass the week before the New Hampshire primary. Afterwards, I found my home with the Prince William Democrats.

The rest of my life

Scientist by nature, Engineer by trade, working in wireless communications. Most of my career has been spent design and build of cellular networks across the US and Europe. Now working on development of 5G. Aspiring to a second career of sports photographer, and all things rugby. Go USA Eagles!
